OBJECTIVE

Aspiring **Frontend Developer** skilled in **React.js**, **Next.js**, and **modern JavaScript**, passionate about building fast, responsive, and user-friendly web applications with clean UI and seamless UX.

TECHNICAL SKILLS - FRONTEND DEVELOPMENT

PROGRAMMING LANGUAGES

- **HTML5 / CSS3** – Semantic markup and modern styling for responsive, accessible UIs.
- **JavaScript (ES6+) / TypeScript** – Writing clean, modular, and type-safe code, implementing dynamic features.

FRAMEWORKS

- **React.js** – Building interactive components, routing, and state management for SPAs.
- **Next.js** – Server-side rendering, optimized performance, and SEO-friendly React apps.

LIBRARIES AND TOOLS

- **Redux** – Efficient state management for scalable React applications.
- **Tailwind CSS** – Rapid prototyping and utility-first styling for consistent layouts.
- **GSAP (Green Sock)** – Smooth, performance-optimized animations for engaging interfaces.
- **Git & GitHub** – Version control, branching, and collaborative workflows.

SOFT SKILLS

- **Problem-Solving:** Quickly debug and optimize frontend issues.
- **Team Collaboration:** Work smoothly with designers, developers, and stakeholders.
- **Creativity & Communication:** Design engaging UI and interactive animations; explain technical concepts clearly.

PROJECTS

SNEAKX - Sneaker E-Commerce Web App – React (React.js), JavaScript, Vite and Vercel

- Developed a **sneaker e-commerce web app** with product search, cart, and like functionality.
- Managed global state with **react use context** and persisted cart data using **local storage**.
- Implemented secure user authentication using **Google Sign-In through Firebase**
- Deployed project on [Vercel](#) for **live demo** and maintained code on [GitHub](#).

MXPO – Movie Explorer Web App – Next.js, TailwindCSS, JavaScript, Vercel

- Built a **responsive movie exploration app** with search, genre navigation, movie details, trailer playback, and “Add to List” features.
- Enabled **sharing** of movie details across devices and integrated **APIs** for real-time cast, ratings, and release info.
- Implemented secure user authentication with **NextAuth**, allowing users to log in via credentials.
- Deployed on [Vercel](#) for **live demo** and maintained source code on [GitHub](#).

EDUCATION

- **Bachelors of Computer Applications** - Osmania University | Cgpa - **7.7/10** **2025**
- **Intermediate** - PB Siddhartha College of Arts & Science | Percentage - **58%** **2022**
- **SSC** - Children’s Montessori High School | Cgpa - **9.3/10** **2020**
